Moisturising Shampoo for Dogs and Cats

# CHAMINOL SHAMPOO

## CHAMINOL SHAMPOO

**CHAMINOL SHAMPOO** is pH balanced for maintaining a healthy skin and coat in dogs and cats. It is uniquely formulated to provide deep cleansing without stripping the coat of its essential oils.

**CHAMINOL SHAMPOO** contains three active ingredients for the management of bacterial and fungal skin infections. In addition, it has de-greasing and descaling capabilities to improve common coat and skin disorders, and is enriched with Vitamin B12 and Panthenol to prevent split ends and promote healthy hair growth.

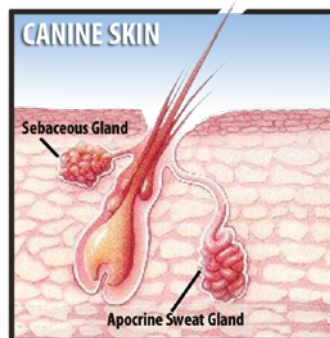

### The hair coat

The hair coat covers nearly the entire body of dogs and cats and is the first line of defence against the environment, antigens and bacteria. Maintaining a healthy hair coat is important for providing adequate thermal protection between the skin and the external environment. It will provide a barrier protection against chemicals, physical and bacterial invasion, as well as providing photo protection, and acting as an aggressive display.

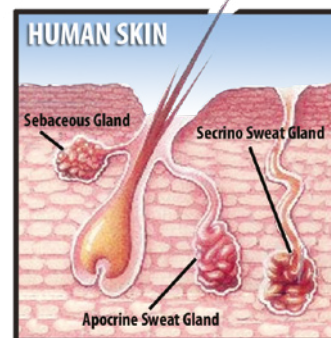

### The skin

The skin is the largest sensory organ in the body, monitoring the environment, regulating temperature changes within the body, preventing desiccation, dehydration and trauma. The skin serves as the second barrier to protect the whole organism from invasion of microorganisms and noxious chemicals. The skin also acts as a source of vitamin D synthesis. Secretions from the skin glands waterproof and lubricate the skin, as well as functioning as pheromones.

The skin reflects the state of health of the animal, as well as indicating the presence of internal diseases. There are critical differences between the skin of humans and dogs and cats, and this should be always borne in mind when choosing a shampoo. Human skin is at least three times thicker and has a lower pH, thus human shampoo will damage and strip out excessive amounts of skin cells from cats and dogs. **CHAMINOL SHAMPOO** is formulated to match the pH of a dogs' or cat's skin.

**Epidermal Thickness:**  
3-5 Layers  
**Epidermal pH: 7.5**

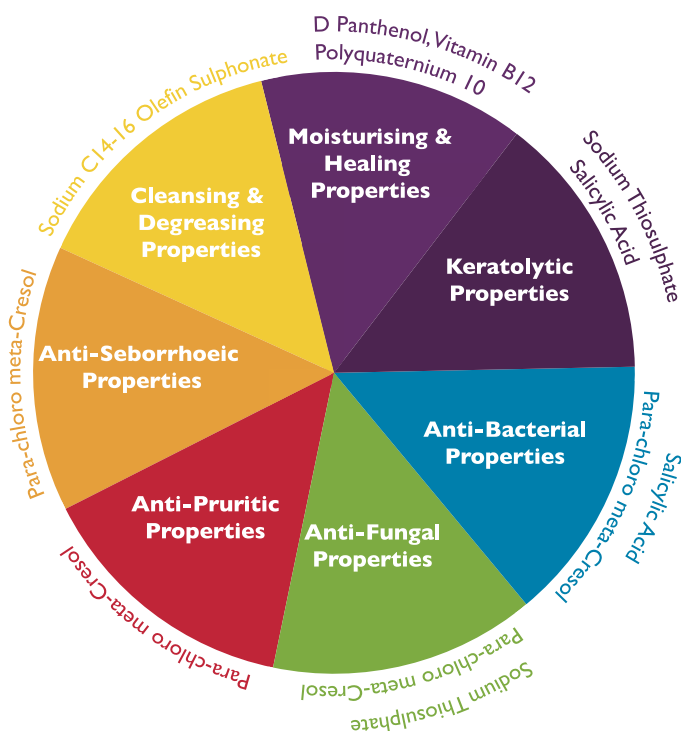

**Epidermal Thickness:**  
10-15 Layers  
**Epidermal pH: 5.5**

## Dermatitis Conditions of Dogs and Cats

Type	Symptoms	Causes
<b>Bacterial Infection</b>	Itching, red skin, excessive grooming, hair loss, puss in the skin.	Streptococcus, Staphylococcus, E. Coli, Proteus, Pseudomonas.
<b>Fungal Infections</b>	Red, raised, crusty skin lesions and circular patches of dry skin and hair loss, coughing, sneezing, fever.	Malassezia, Dermatophytosis, Dermal Coccidiomycosis, Blastomycosis, Candidiasis.
<b>Parasitic Infections</b>	Itching, crusty skin affecting the ears, face and neck. Acute moist dermatitis, seborrhoeic dermatitis.	Migration of parasite larvae, flea, tick, lice infestation. Red mange/demodicosis, sarcoptic mange, ringworm.

## When to use CHAMINOL SHAMPOO & how long will it take to work?

If your pet has a skin and coat disorder or infection, **CHAMINOL SHAMPOO** can be used weekly, depending on the initial condition of the pet. In general it may take three to four weeks for improvement to be seen. Speak to your Veterinarian if **CHAMINOL SHAMPOO** can be used, and for advice on the most appropriate routine.

### Usage Instructions:

Wet the coat with lukewarm water. Pour shampoo along the pet's back. Massage and work the shampoo into the coat, adding water as required to ensure that the entire coat has been covered. Leave in the coat for up to five minutes, after which it should be thoroughly rinsed until water is free of suds. Repeat if necessary. Frequency of use will depend on the coat condition; your veterinarian will advise the most appropriate routine.

**Active Ingredients:** , 2% Sodium Thiosulphate (Source of soluble sulphur), 0.5% Salicylic Acid , 0.2% Para-chloro meta-Cresol.

**Ingredients:** Aqua (Water), Sodium C14-16 Olefin Sulphonate, Cocamide DEA, Propylene Glycol, Sodium Thiosulphate, PEG-120 Methyl Glucose Dioleate, Glycerine, Parfum, Salicylic Acid, Polyquaternium-10, Para-Chloro Meta-Cresol, Sodium Hydroxide, Panthenol, Cyanocobalamin, Cinnamal, Amyl Cinnamal, Eugenol.
